

C_source
VARCHAR

map_d

C_target
VARCHAR

map_obj_d

```
graph TD; C_source[C_source VARCHAR] --> map_d((map_d)); map_obj_d(map_obj_d) --> map_d; map_d --> C_target[C_target VARCHAR];
```

The diagram illustrates a mapping process. It starts with a rectangular box at the top labeled 'C_source' and 'VARCHAR'. An arrow points down from this box to a light blue oval in the center labeled 'map_d'. To the right of the oval is a light green rounded rectangle labeled 'map_obj_d', with an arrow pointing left towards the oval. From the bottom of the oval, an arrow points down to a rectangular box at the bottom labeled 'C_target' and 'VARCHAR'.
